

INSTRUCTIONS FOR AUTHORS

The journal Clujul Medical is published quarterly and the papers submitted for publication should include original papers on clinical or fundamental research, clinical case reports, reviews, letters to the editor, book reviews.

The articles are published after being submitted to blind peer reviewing by experts in specific fields.

Submitting a scientific paper for publication is subject to the fulfillment of the following statements:

- the paper is original and has not been published in other journals or books; please consult the recommendations of the International Committee of Medical Journal Editors regarding overlapping publications. (<http://www.icmje.org/recommendations/browse/publishing-and-editorial-issues/overlapping-publications.html>)

- the paper does not infringe upon any copyright or other proprietary right;

- the manuscript has been reviewed and approved by all named authors.

The statements can be found here:

- Copyright Assignment Form
- Declaration of Conflict of Interest.

All these statements should be included in a formal declaration signed by all the authors. The filled in, signed and scanned image of this of these two forms has to be uploaded at the last step of the submission process (Step 4. Uploading Supplementary Files).

If your paper contains studies on human or animal subjects, you must insert in the "Material and Methods" section a statement mentioning the approval of the medical ethical commission of the organization in which the study was realized.

Please note that "Clujul Medical" is a member of COPE (Committee on Publication Ethics) and failure to comply with their guidelines may lead to the rejection of the manuscript.

ONLY THE MANUSCRIPTS IN ENGLISH WILL BE ACCEPTED

Preparing the manuscripts

The paper should be written in a concise style, and should contain the strictly necessary number of pages, figures, tables.

For submitting a manuscript in electronic format the following conditions must be fulfilled:

- **the text** should be sent as a Word document (not as PDF format), in 12p Times New Roman fonts, 1.5 line spacing. Use only standard abbreviations; the full term for which an abbreviation stands should precede its first use in the text. In the title and the abstract the abbreviations should be avoided;

- **the tables** should be numbered with according to the order in which they are mentioned in the text;

- **the illustrations** (images) should be numbered in order of appearance in the text; Only high quality images will be accepted for publication. Color figures can be published in excellent quality conditions, provided that the authors will cover the entire additional cost thus incurred.

- **the legend** for tables and images should be placed after them. Authors should insert images, diagrams or tables in the text in their desired location (not as separate files).

In case of the reproduction of previously published parts or figures, it is necessary to attach the scanned written consent of the author as well as of the publishing house where it was originally published, including the source, in the fourth stage of the paper submission process.

The names of the patients should be concealed on all illustrations; patients in all photos should have a black band over their eyes in order to prevent their identification.

Structure of the manuscript

Title page (on a distinct page) includes: only the title of the paper! Any identifiable information should be removed, such as: authors' names, department or institution, nor e-mail addresses. This information is entered separately during the submission process on the website. The authors' information should be separated from the article to ensure a blind peer review process.

Abstract (on a distinct page) precedes the text body. The abstract should be structured into the same section as the paper.

Keywords Three to five key words will be written for every paper. Please use Medical Subject Headings (<http://www.ncbi.nlm.nih.gov/mesh>) (the National Library of Medicine's controlled vocabulary thesaurus used for indexing articles for PubMed). A helpful tool that you may use to find the best keywords is the Mesh on Demand (<http://ii.nlm.nih.gov/Interactive/MeSHonDemand.shtml>) provided by NLM.

Original articles should have the following structure:

1. Background & Aims;
2. Patients and methods;
3. Results,

4. Discussion
5. Conclusions.
6. Acknowledgement

The purpose of presentation, peculiarities of the case and ranking of the issues approached within the general knowledge of the respective condition should be emphasized in abstract.

References This journal adheres to International Committee of Medical Journal Editors recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals (www.icmje.org).
